

# XGS Energy

**XGS is a next-generation geothermal technology and project developer**

Offices in Houston, Texas and Palo Alto, California

25 FTEs and growing with extensive subsurface engineering, 10+ GW U.S. renewables development experience

## RECENT ANNOUNCEMENTS

**3,000hr Commercial Demonstration**  
First demonstration of water-independent closed-loop system at commercial geothermal conditions & scale (Coso/NAWS China Lake, CA)

**150 MW Meta New Mexico Agreement**  
Agreement to deliver 150 MW to PNM grid to support Meta's data center operations, 10x the existing geothermal capacity in the state

## PARTNERS AND INVESTORS

# What We Do: XGS System Unlocks New Geothermal Markets

**Modular single-well design** leverages proven drilling tools and procedures

**Zero consumptive water use**, with working fluid circulated in sealed tubes, enabling deployment **anywhere there is hot rock**

Proprietary thermally conductive materials system enhances heat transfer & **economic energy production**

**Proven in the field**, with leading runtime at commercial depth & temperature at California site

# Thank you!
